Terms and Conditions of Sales

TERMS—2% discount for payments in ten days from date of invoice, net, 30 days, to those with established credit. C.O.D. orders must be accompanied by one-fourth cash. Packing will be charged at cost on all orders except bulk truck or car shipments. 6% interest charged on past due accounts. All supplies are net.

PRICES in this list cancel all previously published prices and are subject to change without notice. Order in multiples of 10 of a variety and grade. These prices apply on the following quantities:

Fruit Trees, Shade Trees, Shrubs, Vines and Perennials

300 or more @ 1000 rate (where published).

30 to 300 @ 100 rate.

10 to 30 @ 10 rate.

Under 10 @ 25% above 10 rate.

All grades and varieties in any class allowed to make total. For example: All fruit trees are considered one class, all shrubs one class, etc.

Small Fruits, Hedge-plants, Privet, and all Lining-out Stock

300 of same variety and grade @ 1000 rates.

Under 300 of same variety and grade @ 100 rates.

Evergreen, B & B.

30 trees (any assortment) @ 100 rate.

5 trees (any assortment) @ 10 rate.

Note: Classifications as given above are understood to be as listed under general headings in price list. For example: Fruit Trees, Vines, Shrubs, etc.

Broken lots of less than 10 of any one variety and grade will be billed at 25% above the 10 rate.

BOXES will be charged at cost. BALES will be charged at actual cost of material and labor. No charge for loading bulk trucks or cars.

SHIPPING—Please tell us how and when to ship your order, whether by rail freight, motor freight, or express, stating route if you have a preference. In the absence of definite instructions we will forward shipment the way we think best, without assuming responsibility. We are on the Santa Fe and Missouri Pacific railroads. All shipments travel at risk and expense of purchaser.

TRUCK DELIVERIES—Bulk truck deliveries to customer's place of business can be made to many points at rates as low, or lower, than local freight rates. If you prefer to call for your stock with your own trucks, we should have several days' advance notice so we can have the stock ready.

NON-WARRANTY—We give no warranty, express or implied as to quality, life or productiveness of stock we sell. It is mutually agreed that our liability for stock proven untrue to name shall be limited to replacement or refund of original purchase price. All contracts subject to crop.

CLAIMS—All claims for any cause must be made in writing immediately upon receipt of goods. We will not entertain claims which are filed after goods have been accepted or which are not made within five days after arrival of stock.

SHRUBS

All of our shrubs are field-grown and graded according to the standards of the American Association of Nurserymen. Sizes noted in the descriptions indicate average height of shrubs at maturity. "Hortus Second" is the authority for most of the heights given.

Tied 12 to 18 in., 25; 18 to 24 in., and 2 to 3 ft., 10; 3 to 4 ft., 5 per bundle.

ALMOND, PINK FLOWERING *Prunus glandulosa rosea*

This continues to be one of the aristocrats among flowering shrubs. Neat habit of growth, never gets out of bounds. Withstands high temperatures, extreme droughts and intense cold. In early spring before the leaves appear the stems are covered with double pink flowers, making it very showy and highly ornamental. Should be in every shrub border for early spring color. Excellent for foundation planting. Our plants won't sucker because they are grown on their own roots. 3 to 5 feet.

	Per 10	Per 100	Per 1000

Ardens, Double purple **Lucy**, Double red

MENTOR BARBERRY *Berberis Mentorensis*

This barberry is one of the best ever introduced for the south and southwest. It withstands drought and high temperatures and in the south is evergreen. In Kansas it frequently holds its foliage until February; in places protected from winter sun it will remain green all winter. The foliage is large, thick, leathery, very attractive; red fruits in the fall and winter. It grows very bushy and will reach a height of 5 or 6 feet. There have never been enough of these plants to go around, it is in such great demand.

15 to 18 inches	5.00	45.00	400.00
12 to 15 inches	4.50	40.00	350.00

Thunbergi (Japanese Barberry). Low growing, spreading shrub with numerous thorns and attractive foliage that turns red in the fall. Yellow flowers and red berries. Fine for hedges and mass planting. This barberry does not carry wheat rust. 5 to 8 feet.

18 to 24 inches	5.00	45.00	400.00
15 to 18 inches	4.00	35.00	300.00
12 to 15 inches	3.50	30.00	250.00

BUDDLEIA

Butterfly Bush

Butterfly Bushes are handsome shrubs with long narrow leaves, grow 3 to 4 feet high in one season, and come in a wide range of color: red, purple, lavender, pink, and white.

Butterfly Bushes like reasonably fertile well drained soil, and plenty of sunlight. In the northern two-thirds of the country the tops die down in the winter, but new tops are developed the next season and bloom the same year. Tops should be cut back every spring, except *Alternifolia*.

We offer you a selection of six of the very best varieties.

ALTERNIFOLIA

Hardesty butterfly bush. Blooms early summer with long showy drooping spikes of lilac-purple flowers.

	Per 10	Per 100	Per 1000
No. 1	5.50	50.00	—
Medium	4.50	40.00	—

Charming. The most nearly pink Butterfly Bush we have seen. Large, rather open sprays on tall vigorous bushes. Per 10 Per 100 Per 1000

No. 1	4.00	35.00	320.00
Medium	3.20	28.00	250.00

Dubonnet. Live, reddish-purple, like the wine for which it is named. Extra long, full spikes. Continues to be one of the most popular.

No. 1	4.00	35.00	320.00
Medium	3.20	28.00	250.00

Floralart. Developed in New Mexico by Mr. A. C. Miller and introduced by us. In our opinion it has the best flower of all because nearly the whole spike blooms at one time. On most other varieties the bottom flowers are faded before the top flowers open. For this reason *Floralart* makes best cut flowers. Handsome orchid-lavender flowers in large, full, very compact spikes. Medium size bush.

No. 1	4.00	35.00	320.00
Medium	3.20	28.00	250.00

Red. As nearly red as you will find in Butterfly Bushes. This one is so good that we ought to give it a special name.

No. 1	4.50	40.00	350.00
Medium	3.50	30.00	275.00

White Cloud. Does not grow so large as other varieties but makes neat compact bush completely covered with well formed spikes of white flowers. Especially good in borders and for cut flowers.

No. 1	4.50	40.00	350.00
Medium	3.50	30.00	275.00

SHRUBS (Continued)

CALICCARPA DICHOTOMA (Purpurea) Purple Beautyberry. Large showy clusters of lavender-purple berries, pink flowers. 4 feet.

	Per 10	Per 100	Per 1000
2 to 3 feet	5.50	50.00	450.00
18 to 24 inches	4.50	40.00	350.00
12 to 18 inches	3.50	30.00	—

CARYOPTERIS AZURE

A NEW Blue Spirea introduced by the U. S. D. A. It has deeper blue flowers and darker foliage than Blue Mist and grows into a more compact shrub. In our opinion this is the finest caryopteris on the market.

	Per 10	Per 100
No. 1	5.50	50.00
Medium	4.50	40.00

CARYOPTERIS INCANA. BLUE MIST (Blue Beard, Blue Spirea). Compact, low-growing shrub, covered with masses of powdery-blue flowers from August to frost. Tops are perennial like Butterfly Bush. 5 feet.

	Per 10	Per 100	Per 1000
No. 1	4.00	35.00	—
Medium	3.00	25.00	—

CERCIS CANADENSIS (Redbud). Shrub form. Heart shaped leaves; rosy-red flowers in spring. 40 feet.

5 to 6 feet	20.00	190.00	—
4 to 5 feet	15.00	135.00	—
3 to 4 feet	10.00	90.00	—
2 to 3 feet	6.50	60.00	—
18 to 24 inches	4.50	40.00	—

CHAENOMELES LAGENARIA (Flowering Quince)

Large scarlet flowers produced in great profusion in early spring before the leaves come out. A spectacular shrub and for that reason very popular. We grow ours from cuttings taken from blooming wood thereby insuring uniformity of flower and shrub.

3 to 3½ feet	6.00	55.00	500.00
2 to 3 feet	5.00	45.00	400.00
18 to 24 inches	4.00	35.00	300.00
12 to 18 inches	3.00	25.00	—

FLOWERING QUINCE

Apple Blossom

The flowers of this variety bear a remarkable resemblance to apple blossoms in size, shape and color. In bud they are almost red; when fully open the flowers are a light pink with deeper tones near the outer edges. Blooms early before the leaves are fully developed. Shrubs are vigorous growers, and the tips of the leaves are red on the new growth.

	Per 10	Per 100
2 to 3 feet	9.00	85.00
18 to 24 inches	7.00	65.00

SHRUBS (Continued)

FLOWERING QUINCE

Glowing-Ember (Trade Mark)

We are proud to be the introducers of this superior strain of flowering Quince. It took many years of observation and selection to come up with this upright growing shrub of uniform habit, with brilliant red flowers. It is grown from cuttings of course, in order to perpetuate these desirable characteristics. 10 feet.

	Per 10	Per 100	Per 1000
3 to 3½ feet	7.50	65.00	600.00

12 to 18 inches	3.50	30.00	—

FLOWERING QUINCE

Indian Chief

We have selected this as one of the best red flowering quinces of many varieties that we have tested over a period of years. The flowers are large, scarlet-red, appearing in great profusion before the leaves develop. The shrub is semi-upright, semi-dwarf with medium size dark green shiny foliage. The new growth is reddish in color.

	Per 10	Per 100
2 to 3 feet	9.00	85.00
18 to 24 inches	7.00	65.00

FLOWERING QUINCE

Texas Pink

We have tested many varieties of flowering quince and in our opinion Texas Pink is the best pink. The flowers are quite large and clear pink. The shrub is a sturdy grower with a semi-upright habit of growth with long narrow dark green shiny leaves. The new growth is distinctly reddish adding greatly to the interesting appearance of the plant.

	Per 10	Per 100
3 to 3½ feet	11.00	100.00
2 to 3 feet	8.50	75.00
18 to 24 inches	5.00	45.00

CHIONANTHUS VIRGINICA (Fringe Tree). Long panicles of white fringe-like flowers in May, followed by attractive dark blue fruits.

	Per 10	Per 100	Per 1000
12 to 18 inches, well branched	7.00	65.00	—

CORNUS (Dogwood).

Alba sibirica (Siberian Dogwood). Coral-red branches, white flowers, blue berries. Especially attractive in winter. 10 feet.

3 to 4 feet	7.50	70.00	—
2 to 3 feet	6.50	60.00	550.00

Stolonifera (Red-osier Dogwood). Dark red branches, large clusters of white flowers in early summer followed by bluish-white berries.

3 to 4 feet	7.50	70.00	—
2 to 3 feet	6.50	60.00	—

SHRUBS (Continued)

COTINUS COGGYGRIA (**Smoke Tree or Purple Fringe.**) Rapid growing, highly ornamental shrubs with large panicles of smoky purple flowers. Thrives in heat and drought. 15 feet.

	Per 10	Per 100	Per 1000

HYDRANGEA PEEGEE

Hydrangea paniculata grandiflora

In keeping with the Willis policy of striving for the best, we are offering the Meehan strain of Hydrangea Peegee, known to be the finest of Peegees. Enormous cone-shaped heads of white flowers, often a foot or more across. The flowers slowly change from white to pink, progressing to rose, and finally in autumn to bronze. Make good winter bouquets. Long blooming season from July to October. Grow 6 to 8 feet high. Use for foundation planting, shrub borders, or individual specimen. 8 feet.

	Per 10	Per 100	Per 1000
2 to 3 feet	6.50	60.00	550.00
18 to 24 inches	5.50	50.00	450.00

SHRUBS (Continued)

HYDRANGEA (Continued)

NIKKO BLUE HYDRANGEA

The Most Beautiful Hardy Blue Hydrangea

Both hardy and beautiful. It has withstood temperatures of 20 degrees below zero. The tops die down to the ground every winter, but give them a little mulch protection and the crowns will grow into bushy shrubs in one season, 2 to 4 feet tall with attractive, luxuriant foliage and great masses of flowers.

Because the flowers are borne on the new wood, you get blooms every year, and lots of them. It is not at all unusual to see flower heads more than a foot across and the shrub completely covered with them—a wonderful show.

In alkaline soil the flowers are pink; in acid they are blue. It's easy to change alkaline soil into acid with aluminum sulphate (two tablespoons to a gallon of water). Useful for:

Perennial Borders	Planting in Tubs and Boxes
Shrub Borders	Foundation Plantings
Lawn Specimens

LILACS (Continued)

CUT-LEAF CHINESE LILAC

New! A form of the Rothomagensis or Chinese Lilac with leaves that are deeply cut giving them a graceful lacy appearance. Otherwise it is the same as the Chinese, having rich reddish-purple blossoms in the spring and again in the fall. A splendid novelty. Supply limited.

	Per 10	Per 100	Per 1000
2 to 3 feet	7.00	65.00	—
18 to 24 inches	6.00	55.00	—

Rothomagensis, Pink. Selected strain with beautiful pink flowers.

2 to 3 feet	6.00	55.00	—
18 to 24 inches	5.00	45.00	—

Rothomagensis, White. A selection of Rothomagensis that has white flowers slightly tinged with lavender. It is as near white as any Chinese lilac we have seen.

2 to 3 feet	6.50	55.00	—
18 to 24 inches	5.00	45.00	—

Vulgaris. (Common or Old-fashioned Lilac). Hardy, popular shrub. Purplish flowers in large panicles. April-May. 12 to 18 feet.

3 to 4 feet	7.00	65.00	600.00
2 to 3 feet	5.50	50.00	450.00
18 to 24 inches	4.50	40.00	350.00

PHILADELPHUS (Mockorange).

Coronarius (Sweet Mockorange). A well-known, popular, hardy shrub. Fragrant white flowers in May and June. Vigorous grower. 10 feet.

3 to 4 feet	7.00	65.00	600.00
2 to 3 feet	5.50	50.00	450.00
18 to 24 inches	4.50	40.00	350.00

lemoinei Enchantment. Single white flowers, in thick panicles on sturdy heavy foliaged plant. 7 to 8 feet.

3 to 4 feet	7.00	65.00	—
2 to 3 feet	6.00	55.00	—
18 to 24 inches	4.50	40.00	—

lemoinei Mont Blanc. Blooms profusely with exceedingly fragrant white flowers.

2 to 3 feet	6.50	60.00	—
18 to 24 inches	5.50	50.00	—

Minnesota Snowflake (Plant Patent No. 538). Very double flowers of white. Blooms several times during season. As hardy as it is beautiful. Coming from Minnesota, you may be sure it will survive the most rugged winters. Very profuse blooming, and the flowers are unusually sweet-scented. The bush grows symmetrically and very quickly. Thrives in ordinary soil, in either sun or shade. Far superior to Virginialis or any strain—an extraordinarily good Mock Orange. 8 feet.

3 to 4 feet	10.00	90.00	—
2 to 3 feet	7.50	70.00	—
18 to 24 inches	6.50	60.00	—

Virginialis (Virginal Mockorange). Bushy symmetrical shrubs with semi-double white fragrant flowers. Prolific bloomer May-June. 7 to 8 feet.

2 to 3 feet	6.00	55.00	500.00
18 to 24 inches	5.00	45.00	400.00

SHRUBS (Continued)

PHYSOCARPUS OPULIFOLIUS NANA (Dwarf Ninebark). Dwarf shrub with refined foliage resembling Alpine Currant. Excellent for low formal hedges.

	Per 10	Per 100	Per 1000
18 to 24 inches	4.50	40.00	—
12 to 18 inches	3.50	30.00	—

PRIVET (See Page 13)

PRUNUS

Cistena (Purple Leaf Plum). A dwarf shrub with deep purplish-red foliage.

3 to 4 feet	12.00	100.00	—
2 to 3 feet	9.00	85.00	—

Tomentosa (Manchu or Nanking Cherry). Large white flowers just before the leaves appear; attractive serrate foliage. Bears large red, edible cherries. A superior dual-purpose shrub. 8 feet.

2 to 3 feet	6.00	55.00	—
18 to 24 inches	5.00	45.00	—

HANSEN'S BUSH CHERRY

Prunus besseyi

Because this shrub is almost always featured for its fruit-bearing qualities, its ornamental value is often overlooked. In fact if it bore no fruit at all it would be worthy of a place in the garden.

The foliage has an unusual blue-green tinge. The habit of growth is graceful and it never gets too large. Best of all, in the fall the foliage changes to brilliant purple and crimson. Large black fruits, good for preserves. 5 feet.

Transplants, branched	Per 10	Per 100	Per 1000

Thunbergi. Low growing shrub, slender branches. Spreading habit. Feathery foliage, pure white flowers, early bloomer. 5 feet.

2 to 3 feet	6.00	55.00	—
18 to 24 inches	4.50	40.00	350.00
12 to 18 inches	4.00	35.00	300.00

Vanhouttei (Bridalwreath). Great masses of white flowers in early spring. Sometimes called Bridal Wreath. 6 feet.

2 to 3 feet	5.00	45.00	400.00
18 to 24 inches	4.00	35.00	300.00
12 to 18 inches	3.50	30.00	250.00

SUMAC (See *Rhus*)**SNOWBALL (See *Viburnum*).****TAMARIX.** Grown chiefly for its fine, graceful foliage and showy flowers.**Africana.** Slender, spreading branches covered with feathery green foliage. Pink flowers. 10 feet.

4 to 5 feet	7.50	70.00	—
3 to 4 feet	6.50	60.00	550.00
2 to 3 feet	5.50	50.00	450.00
18 to 24 inches	4.50	40.00	350.00

NOTICE: The tops of tamarix must be cut back short when transplanting. If this is not done, they may fail to grow.

SHRUBS (Continued)

TAMARIX (Continued)

Hispida (Kashgar T.). We are often asked what tamarix we think to be the best. The answer is Hispida. It is a graceful shrub with fine feathery blue-green foliage and bright pink flowers that bloom off and on all summer. You can trim it to make a neat hedge or plant it for individual specimens. The foliage is useful for making bouquets, for which it is used by many florists. 7 feet.

	Per 10	Per 100	Per 1000
3 to 4 feet	6.50	60.00	—
2 to 3 feet	5.50	50.00	—
18 to 24 inches	4.50	40.00	—
Summer Glow. Similar to Hispida but flowers a deeper shade of pink.			
3 to 4 feet	6.50	60.00	—
2 to 3 feet	5.50	50.00	—
18 to 24 inches	4.50	40.00	—

VIBURNUM

Dentatum (Arrowwood). Rounded, coarsely-toothed leaves. Large white flower clusters in May-June followed by attractive blue-black fruits. 15 feet.

2 to 3 feet	5.50	50.00	—
18 to 24 inches	4.50	40.00	—

Opulus (European Cranberry-bush). Leaves 3 to 5 lobed like a maple. Showy white flowers and brilliant red fruit persisting until spring. Highly ornamental. 10 to 12 feet.

2 to 3 feet	7.00	65.00	—
18 to 24 inches	5.50	50.00	—
12 to 18 inches	4.50	40.00	—

Opulus sterilis (Common Snowball). Similar to the Cranberry-bush but the flowers are in large balls, very showy.

2 to 3 feet	7.00	65.00	—
18 to 24 inches	5.50	50.00	—
12 to 18 inches	4.50	40.00	—

WEIGELA

Newport. An improved variety. Blooms very freely with brilliant red flowers in May-June. 5 feet.

2 to 3 feet	6.50	60.00	—
18 to 24 inches	5.50	50.00	—

Rosea (Florida). Bright pink trumpet-shaped flowers. 6 to 8 feet.

2 to 3 feet	6.00	55.00	—
18 to 24 inches	5.00	45.00	—
12 to 18 inches	3.50	30.00	—

Vanicek. New variety with deep red flowers.

2 to 3 feet	6.50	60.00	—
18 to 24 inches	5.50	50.00	—

Variegated. A dwarf shrub with leaves variegated gold and green. Pink flowers.

18 to 24 inches	5.50	50.00	—
12 to 18 inches	4.00	35.00	—

WILLOW (Salix)

Discolor (American Pussy Willow). Large furry grey catkins in early spring before leaves appear. 20 feet.

4 to 5 feet	8.50	75.00	700.00
3 to 4 feet	6.00	55.00	500.00
2 to 3 feet	5.00	45.00	400.00

Pussy Willow, Pink. A selected strain that has pink catkins. Very attractive. Fine for forcing.

3 to 4 feet	7.00	65.00	—
2 to 3 feet	6.00	55.00	—

PRIVET

PRIVET (*Ligustrum*)

Amur River North. Hardy, well adapted to northern states. Upright branches, rather glossy, oval leaves.

	Per 100	Per 1000
2 to 3 feet, 4 canes and up	18.00	150.00
18 to 24 inches, 3 canes and up	14.00	125.00

12 to 18 inches, 3 canes and up	12.00	100.00
12 to 18 inches, 2 canes	9.00	80.00

Amur River South. (*L. sinensis*). Very bushy plants with fine box-like foliage. Makes a beautiful, dense hedge. Suitable for planting in Oklahoma and south. Transplants.

18 to 24 inches, well branched	14.00	125.00
12 to 18 inches, well branched	12.00	100.00

California. Glossy green leaves, suited to southern half of the United States. Extremely popular for formal hedges.

2 to 3 feet, 4 canes and up	16.50	140.00
18 to 24 inches, 3 canes and up	12.50	110.00
12 to 18 inches, 3 canes and up	9.00	80.00

Regel. Low growing, dense, horizontal spreading branches. Desirable for low mass planting.

	Per 10	Per 100	Per 1000
2 to 2½ feet spread, well branched	5.50	50.00	450.00
18 to 24 inches, spread, well branched	4.50	40.00	350.00
12 to 18 inches, spread, well branched	3.00	25.00	220.00

SPREADING AMUR PRIVET

A selection of the hardy Amur River North Privet that grows horizontally like the Regal Privet. Grows more rapidly than Regel. Can be used wherever the latter is planted.

	Per 10	Per 100	Per 1000
2 to 2½ feet, spread	4.50	40.00	350.00
18 to 24 inches, spread	4.00	35.00	300.00
12 to 18 inches, spread	3.00	25.00	200.00

ERECT BORDER PRIVET

(*Obtusifolium erecta*)

New! Here is one which produces a dense hedge more quickly than Amur Privet North. It has a dense, branching habit of growth, and grows rapidly, branching better than Amur. Holds green foliage longer than Amur. Large lustrous foliage and it is hardy!

	Per 100	Per 1000
3 to 4 feet, 5 canes and up	20.00	180.00
2 to 3 feet, 4 canes and up	18.00	150.00
18 to 24 inches, 3 canes and up	14.00	125.00
12 to 18 inches, 3 canes and up	12.00	100.00

NEW SERVICES

Customers who wish may now have their evergreens sprayed with **Wilt-Pruf** before digging. The trees can also be burlapped with **No-Rot** burlap, which is treated to last much longer than untreated burlap. There is a small extra charge for this service. See page 27.

VINES

AMPELOPSIS ACONITIFOLIA (Monkshoodvine)

Not new, but not well known, although it deserves to be. A vining plant with beautiful cutleaf foliage and orange berries in autumn. From China.

	Per 10	Per 100
2 year No. 1	5.00	45.00
2 year Medium	4.00	35.00

AMPELOPSIS (*Parthenocissus*) (Ivy)

Englemanni (*Engleman Creeper*). Hardy clinging vine, bright autumn colors.

	Per 10	Per 100	Per 1000
2 year, No. 1	4.00	35.00	300.00
2 year, Medium	3.50	30.00	250.00

Quinquefolia (*Virginia Creeper*). Rapid growing five leaf ivy. Hardy and suitable for covering stone walls, trellises, fences, etc.

	Per 10	Per 100	Per 1000
2 year, No. 1	4.00	35.00	300.00
2 year, Medium	3.50	30.00	250.00

Parthenocissus tricuspidata (*Boston Ivy*). Used to be called *Ampelopsis veitchii*. Continues to be one of the most aristocratic and refined of vines. It will cling to brick, stucco, stone, and rough wood without support. The foliage stands smoke and dust well, and in autumn turns brilliant shades of scarlet and orange.

	Per 10	Per 100	Per 1000
2 year, No. 1	5.00	45.00	—
2 year, Medium	4.00	35.00	—

CELASTRUS SCANDENS (*American Bittersweet*). Hardy vine producing clusters of yellow berries that burst open when ripe revealing brilliant red centers. Excellent for winter decoration, indoors and out. Our plants are grown from cuttings taken from blooming plants. Seedlings sometimes fail to fruit.

	Per 10	Per 100	Per 1000
2 year, No. 1	4.50	40.00	350.00
2 year, Medium	3.50	30.00	250.00

CLEMATIS

Crispa (*Curly Clematis*). Urn-shaped flowers, bluish-purple, fragrant. June to September.

	Per 10	Per 100	Per 1000
No. 1	4.50	40.00	—
Medium	3.50	30.00	—

Paniculata. In September and October these vines are covered with great masses of fragrant white flowers about one inch across. A longtime favorite.

2 year, No. 1	5.50	50.00	450.00
2 year, Medium	4.50	40.00	350.00

Texensis (Coccinea) (*Scarlet Clematis*). Brilliant scarlet urn-shaped flowers with thick petals. July-September.

	Per 10	Per 100	Per 1000
No. 1	4.50	40.00	—
Medium	3.50	30.00	—

EUONYMUS

Fortunei Coloratus (*Purpleleaf Wintercreeper*). Evergreen foliage that turns bronzy-red in autumn. Excellent ground cover.

	Per 10	Per 100	Per 1000
2½ inch pots	3.00	25.00	—
2-inch pots	2.50	20.00	—

Fortunei Minimus (*Baby Euonymus*). Slow-growing dwarf broadleaf evergreen with small leaves. Clings tightly to rough surfaces; excellent for covering low walls.

	Per 10	Per 100	Per 1000
3-inch pots	4.00	35.00	—
2-inch pots	3.00	25.00	—

VINES (Continued)

HONEYSUCKLE (See *Lonicera*)

HEDERA HELIX (English Ivy). Evergreen vines that will cling to stone, brick and stucco. Ideal for covering walls and chimneys.

	Per 10	Per 100	Per 1000
3-inch pots	2.40	20.00	—
2-inch pots	1.75	15.00	—

LONICERA (Honeysuckle)

Goldflame (Trademark). Large flame-coral trumpets lined with gold, fragrant after nightfall. Hardy; everblooming. This is the true Gold-flame, an introduction of The Willis Nurseries.

2 year, No. 1	5.50	50.00	450.00
2 year, Medium	4.50	40.00	350.00

Halls Japan. (*L. Halleana*). Flowers pure white changing to yellow; very fragrant. Vigorous grower, evergreen foliage.

2 year, No. 1	2.50	22.50	200.00
2 year, Medium	2.10	18.00	160.00

Purpleleaf. (*L. Japonica*, Purpleleaf). Evergreen foliage; bronzy in summer, purple in fall and winter. Fragrant creamy pink flowers all summer. Very vigorous grower. Good for screens, hedges, planter boxes. Can be sheared.

2 year, No. 1	4.00	35.00	300.00
2 year, Medium	3.50	30.00	250.00

Semperfivens magnifica (Dreer's Everblooming H.). Blooms all summer with large clusters of coral-red trumpet-shaped flowers.

2 year, No. 1	5.50	50.00	450.00
2 year, Medium	4.50	40.00	350.00

REDGOLD HONEYSUCKLE

(Trademark)

Lonicera Tellmanniana

Extremely long flowers that are very striking. The buds are golden, flushed with red. They open into huge, intensely golden trumpets. The foliage is very clean, light green above, blue-green below. In windy weather the varying colors caused by the difference in shades creates unusual and interesting effects. Blooms May-June.

	Per 10	Per 100	Per 1000
2 year, No. 1	5.50	50.00	450.00
2 year, Medium	4.50	40.00	350.00

POLYGONUM

Auberti (Silver Lacevine). One of the fastest growing vines. Just the thing to cover a big area in a short time, either on a trellis or on the ground. Blooms the first year with great masses of foamy white flowers.

2 year, No. 1	5.00	45.00	400.00
2 year, Medium	4.00	35.00	300.00

Reynowtria. New! A wonderful addition to the list of useful ground-covers. Grows to a height of only 6 to 12 inches. Fall blooming with reddish-pink flowers. Foliage turns brilliant red in fall.

2 year, No. 1	5.00	45.00	—
2 year, Medium	4.00	35.00	—

WISTERIA

Sinensis (Chinese Wisteria). Long attractive clusters of purplish-blue flowers early summer. Vigorous grower. Our plants were propagated from blooming wood.

3 year, No. 1	4.50	40.00	—
2 year, No. 1	4.00	35.00	300.00
2 year Medium	3.00	25.00	200.00

SHADE AND ORNAMENTAL TREES

All our shade trees are grown in wide rows with plenty of space between them in the row to allow for proper development. Calipers are measured 6 inches above the collar. Sizes given in descriptions indicate height at maturity as given in "Hortus Second."

BALLED AND BURLAPPED SHADE TREES

Certain varieties and grades of shade trees can be balled and burlapped. For this service, there will be additional charge per tree as follows:

2 to 2½ inch cal.	\$6.00	6 to 8 feet	\$3.00
1½ to 2 inch cal.	\$5.00	5 to 6 feet	\$2.25
1¼ to 1½ inch cal.	\$4.00	4 to 5 feet	\$1.75
8 to 10 feet	\$4.00		

All trees are priced bare root unless otherwise stated.

ASH (*Fraxinus*)

Green (*Fraxinus lanceolata*). Large round-topped trees with attractive compound leaves. Does well in semi-arid areas and high altitudes. Grows rapidly. 60 feet.

		Per 10	Per 100
1½ to 2 inch caliper		45.00	400.00
1¼ to 1½ inch caliper		32.50	300.00
8 to 10 feet		25.00	225.00
6 to 8 feet		18.00	165.00
5 to 6 feet		12.50	110.00

Marshall's Seedless. Because this tree produces no seeds, and grows into a round symmetrical tree, it is desirable for street and lawn planting. Grows quite rapidly. 50 to 60 feet.

1¼ to 1½ inch caliper	35.00	325.00
8 to 10 feet	30.00	275.00
6 to 8 feet	22.50	200.00
5 to 6 feet	15.00	135.00

FLOWERING CRABS

(*Malus*)

At long last, flowering crabs are getting the attention they deserve. First of all, Flowering Crabs are highly ornamental. Not only are the trees themselves attractive, but the flowers and fruits are decorative. Some varieties produce edible fruit, notably Hopa and Dolgo.

Flowering Crabs can also be used for shade. They are especially desirable for this purpose, on small home grounds where there is no room for the larger trees such as elms, oaks, and sycamores. Out of the many varieties of Flowering Crabs on the market, we have selected a group that we consider the best, based on years of observation.

Almey (Rosy Bloom). New. Deep crimson buds open to huge scarlet blooms with white star-like markings at base of each. Scarlet fruits. Excellent tree to pot for cash and carry sales. Usually blooms same year it is planted.

	Per 10	Per 100
4 to 5 feet	17.50	160.00
3 to 4 feet	15.00	140.00

Dolgo. White flowers, large showy red fruit; good for jelly. 40 feet. 5 to 6 feet 13.50 125.00
4 to 5 feet 11.00 100.00
3 to 4 feet 7.00 65.00
2 to 3 feet 5.00 45.00

Eleyi (Eley Crab). Foliage red in spring, flowers vinous red, single; fruit red. 40 feet.
4 to 5 feet 13.50 125.00
3 to 4 feet 9.00 85.00
2 to 3 feet 5.50 50.00

SHADE AND ORNAMENTAL TREES (Continued)
FLOWERING CRABS (Continued)

Floribunda, Red Fruiting (Japanese Flowering Crab). Buds coral red; flowers pale pink turning to snow white. The fruits on this variety are a showy red instead of the usual yellow.

	Per 10	Per 100
3 to 4 feet	9.00	85.00
2 to 3 feet	5.50	50.00

Jay Darling. Flowers and fruit purplish-red. Similar to Eleyi.
 4 to 5 feet 13.50 125.00
 3 to 4 feet 9.00 85.00

Klehm's Bechtel. Klehm's Improved. Dwarf crab, double pink flowers, improved strain. Larger leaves than Bechtel, more resistant to rust.
 3 to 4 feet 11.00 100.00
 2 to 3 feet 7.00 65.00

Niedzwetzkyana (Red-Vein Crab). Single red flowers, red fruit; bark and wood reddish. 40 feet.

	Per 10	Per 100

3 to 4 feet	9.00	85.00
2 to 3 feet	5.50	50.00

HOPA FLOWERING CRAB

From early spring until freezing weather this tree will be a delight to you. In the spring the expanding foliage is bronzy red but before the leaves are fully developed the whole tree bursts into bloom, being completely covered with the most magnificent fragrant pink flowers. It is hard to imagine anything more showy.

The flowers are followed by the prettiest tiny red apples that bejewel the tree during the summer. You can make a good jelly from them.

	Per 10	Per 100
5 to 6 feet	13.50	125.00
4 to 5 feet	9.50	90.00
3 to 4 feet	8.00	75.00

Profusion. Large single carmine flowers. Bright red fruits, bronzy-red foliage.

	Per 10	Per 100
3 to 4 feet	9.00	85.00

Redfield (New). An apple for the lawn and other ornamental plantings because of its large and very dark pink flowers. The fruit is medium in size, dark deep solid red in color, with deep red flesh. The foliage is dark with a reddish green tinge early in the season. This and Redford are two very desirable ornamentals.

	Per 10	Per 100
4 to 5 feet	13.50	125.00
3 to 4 feet	9.00	85.00

Redford (New). A sister of Redfield and similar in all characters of tree and fruit. The petals are deep pink but not as dark as those of Redfield. The fruit is medium in size, deep dark solid red, with deep red flesh. The foliage has a characteristic reddish-green tinge early in the season. Lovers of handsome ornamental apples will plant this sort and Redfield.

	Per 10	Per 100
4 to 5 feet	13.50	125.00
3 to 4 feet	9.00	85.00

Red Silver. Silver and red foliage. Crimson flowers, red fruit. Its semi-dwarf habit of growth makes it desirable where a small tree is needed.

	Per 10	Per 100

HYBRID ELMS
(American Chinese)

There are many strains of hybrid elms on the market. After years of observation, we are offering two that we consider the best:

Willis. This has been grown in the middle west for many years with excellent results. Young trees have a smooth gray bark. The leaves are large, resembling those of the American elm. Very rapid growth.

Rosehill. Grows a little more slowly than Willis, but carries a heavier caliper for the height. Branches well and has very attractive foliage.

	Per 10	Per 100

IDAHO LOCUST (See Locust)

IMPERIAL LOCUST

(Plant Patent No. 1605)

The IMPERIAL locust is an exceptionally graceful, spreading variety that is destined for recognition as one of the outstanding trees of this age. Branches are symmetrically arranged, forming a much more regular and compact tree than other Honeylocusts. It grows straight and strong without staking and produces a dense and uniform crown with a minimum of trimming in the nursery.

	Suggested Retail	10-49	50-249
	Each	Each	Each
7 to 8 feet, whips	7.85	3.40	3.05
6 to 7 feet, whips	6.50	3.00	2.70

4 to 5 feet, whips	4.40	2.00	1.80

CHRISTINE BUISMAN ELM

The Coming Shade Tree

Resistant to Elm Diseases

Extremely resistant to Dutch elm disease and phloem necrosis.

Grows quite rapidly. We have produced trees ten feet high in four years from small root-cuttings.

Produces straight stems of heavy caliper, with central leaders, without forks or crotches. It has slender but numerous, ascending branches, which produce a great mass of dark green foliage.

Young trees tend to have a broad base and a pyramidal top, but when mature become round topped, like the American Elm.

Highly satisfactory for both lawn and street planting.

The Christine Buisman Elm is an European selection (from Holland) of the Smooth Leaf European Elm (*Ulmus carpinifolia*). Repeated tests by the United States Department of Agriculture show that it is immune to phloem necrosis, and highly resistant to Dutch elm disease.

The testing was done under the direction of Dr. Roger U. Swingle, pathologist in charge of the Horticultural Crops Research Branch, Ornamental Crops Section, Worthington, Ohio. On July 19, 1954 Dr. Swingle reported as follows:

"The Christine Buisman Elm has been tested repeatedly for resistance to the Dutch elm disease and elm phloem necrosis since stock of the selection to the Dutch elm disease and elm phloem necrosis since stock of the selection was received at this laboratory in 1946. We have subjected the tree to rather severe disease resistance tests during this period and the selection has proven to be highly resistant to both of these diseases."

The Christine Buisman Elm has proven entirely hardy here in Ottawa for more than ten years and it has also survived the severe winters in the Chicago area. Mr. E. L. Kammerer, arboriculturist at the Morton Arboretum, Lisle, Illinois (near Chicago) wrote us on September 9, 1954:

"The Christine Buisman Elm, about which you inquire, has been on trial at the Morton Arboretum since the spring of 1949. At that time five 18 inch plants were received from the Bureau of Plant Industry at Columbus, Ohio. All plants still survive. They are apparently perfectly hardy in this area."

In order to perpetuate its disease resistance the Christine Buisman Elm must be propagated vegetatively. There can be no assurance that trees propagated by budding or grafting on elm seedlings will be disease resistant. Be sure the trees you buy have been propagated vegetatively. We propagate ours by root-cuttings which are carried a season in pots and then transplanted to the fields. The accompanying illustration of Buisman Elms in our nursery will show you what sturdy trees we produce.

	Suggested Retail	Per 10	Per 100

CHRISTINE BUISMAN ELM

SHADE AND ORNAMENTAL TREES (Continued)

MORAINE LOCUST

(Plant Patent No. 836)

The Moraine Locust is a round-headed tree when young, but tall and vase-shaped when older, attaining a height of 80 to 100 feet. It grows more rapidly than the common type of locust because of the absence of seed pods and thorns. This attribute, together with the small leaflets which mostly drift into the lawn between the blades of grass, makes little fall clean-up necessary. It stands pruning well but very little is necessary since the lower branches self-prune as the top grows wider. This makes it desirable for narrow street planting of small properties, as sufficient clearance can be maintained for any type of traffic. Transplants easily. 75 to 100 feet.

	Suggested Retail	10-49 Each	50-249 Each
7 to 8 feet, whips	7.50	3.35	3.00
6 to 7 feet, whips	6.00	2.75	2.50
5 to 6 feet, whips	5.00	2.25	2.00

SHADE AND ORNAMENTAL TREES (Continued)
HONEY LOCUST (Continued)

SKYLINE LOCUST
 (Plant Patent No. 1619)

Skyline locust is a stately and unusual variety with distinctive pyramidal form. It develops an exceptionally strong, sturdy trunk and shapely crown without being staked or specially trimmed. Branches are uniformly spaced and arranged, resulting in a well-filled tree of rather formal appearance. The leaves of Skyline are dark green and of a heavy, leathery texture. They are more closely spaced, and the leaflets are larger than the average Honeylocust produces, thereby contributing to the compact appearance of the crown. An added touch is the reddish-bronze cast which characterizes the emerging leaves.

	Suggested Retail	10-49 Each	50-249 Each

Red or Scarlet (*A. rubrum*). Smooth gray bark, leaves with 3 to 5 lobes; red flowers before leaves. Valuable as a street and park tree. 120 feet.

2½ to 3 inch caliper, B & B	200.00	—
2 to 2½ inch caliper, B & B	150.00	—

SHADE AND ORNAMENTAL TREES (Continued)

MAPLE (Continued)

SOFT OR SILVER MAPLE
(*Acer saccharinum*)

Fast-growing tree with gray bark and deeply cut leaves that are green above and silvery beneath. There has been a great increase in use of this tree in recent years because it grows rapidly thus giving quick shade and is adapted to a wide variety of soils and situations. It sometimes grows to a height of 60 to 80 feet or more.

Our trees are superior to the common run of nursery-grown soft maple because they are grown with central leaders without crotches, are well branched with straight smooth trunks of good caliper.

EVERGREENS

The name Willis has become synonymous with Quality in evergreens and there is good reason for it.

A crew of trained men spends most of its time in our evergreens shearing and pruning with skilled hands to insure compactness and symmetry. No diseases or insect pests are permitted a foothold in our trees and no weeds, noxious or otherwise, will be found in our evergreen blocks. We would like to have you come to see for yourself.

All of our evergreens are grown in soil especially suitable for balling. Although we cannot assume responsibility for results, our evergreens have given satisfaction throughout the middlewest.

All evergreens are priced balled and burlapped (B & B).

WILT-PRUFING

If you would like to have your evergreens sprayed with Wilt-Pruf before they are dug, we are prepared to do it for the following additional charges:

Upright	Spreaders	Cost per tree
Up to 3 feet	Up to 24 inches	\$.25
3 feet to 5 feet	24 inches to 36 in.	\$.30
Over 5 feet	Over 3 feet	\$.35

NO-ROT BURLAP

Customers may have their fall-dug evergreens burlapped with No-Rot burlap. This is specially treated to make it last several months longer than untreated burlap. There will be a nominal charge of only 10¢ per tree for this service.

CUPRESSUS (Cypress)

	Each Per 10	Each Per 100
<i>Arizonaica Gareei.</i> Blue whipcord foliage. Grows in a compact pyramidal form with little shearing. Withstands heat and drought. Hardy at Ottawa. Grafted trees.

JUNIPER SCOPULORUM

*Platinum*An Outstanding New Evergreen
(Plant Patent No. 1070)

This splendid new Juniper, recently introduced by us, is finding wide acceptance. Its brilliant silvery blue color is retained the year around. It grows fairly rapidly, but because the foliage is so dense, very little shearing is required to make it compact and symmetrical. Especially adapted to the Great Plains, the Mountain states, and the Southwest. It has never blighted with us. Upright pyramidal shape.

3 to 4 feet		6.50	6.00
2 to 3 feet		5.00	4.50

New!

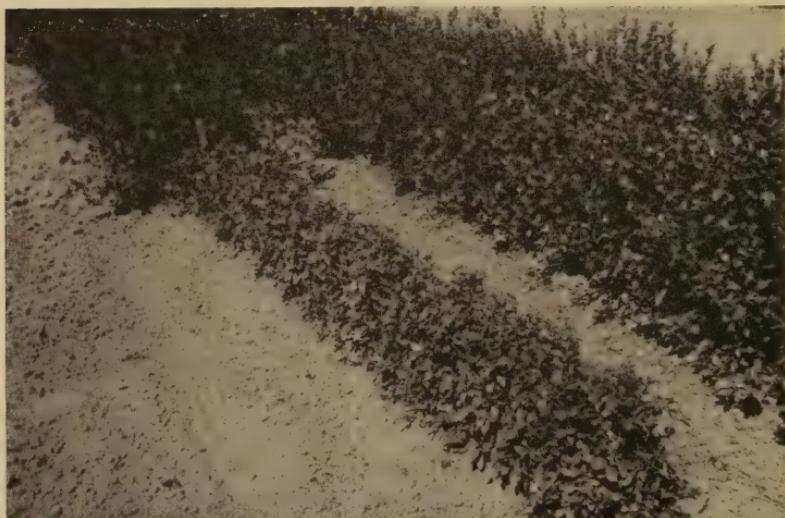

Handsome!
Useful!

After observing the performance of this Euonymus for several years, we were so impressed by its many excellent qualities that we decided to give it a special name to distinguish it from other strains of Euonymus.

Euonymus Dupont is a selection of the small-leaf strain of Euonymus patens (Kiautschovicus) one of the most useful broadleaf evergreens ever introduced.

It is characterized by small dark green, clean-cut leaves set closely on the stems. It is extremely bushy for its height. Two-year-old plants often have as many as 30 to 50 canes.

In addition to making a very compact growth, it produces a vigorous root system characterized by many fibrous roots. Because of this it transplants bare root very readily. In fact it can be transplanted successfully almost any time of the year. Its growth is fairly rapid, yet it can be kept within bounds by occasional shearing. The more it is sheared the denser the growth.

Euonymus Dupont hedge created by one shearing of two-year-old plants in nursery row. Note uniformity and compactness.

Euonymus Dupont

Euonymus Dupont has many uses:

Hedges, formal and informal. Its fine foliage and dense growth make it a good substitute for boxwood. Excellent for bordering gardens, walks, drives, etc. Can be kept as low as six inches.

Foundation Plantings on the new style low houses made of Euonymus Dupont are very effective and inexpensive.

Picture Windows are often so close to the ground there is little room for planting under them. Euonymus Dupont will solve this problem with either a formal or informal planting.

Planter Boxes. Euonymus Dupont gives a rich effect in planter boxes. Can be used with flowers for color.

Walls. Large expanses of bare walls can be softened by planting Euonymus Dupont against them. It will adhere to stone, brick and stucco.

BROADLEAF EVERGREENS (Continued)

EUONYMUS PATENS (Small Leaf). Ideal for evergreen hedges. Makes a very bushy plant that may be allowed to grow informally, or by shearing can be made into a compact formal hedge anywhere from 10 inches to 3 feet high. Excellent substitute for boxwood in the middle-west. Use for boundary hedges, or for enclosing rose and flower gardens and for formal planting. This is an extremely useful plant.

Can be planted any time of the year. Transplants very easily with a minimum of loss.

LINING-OUT STOCK

Our modern propagating plant is devoted to the production of high quality lining-out stock. We offer an excellent assortment of shrubs, shade trees, vines, evergreens, broadleaf evergreens. See page 40.

CHRISTINE BUISMAN ELM

Why not plant elms that you **know** will not be attacked by the elm diseases. The Christine Buisman elm has been tested by the U.S.D.A. for many years and pronounced immune to phloem necrosis and extremely resistant to Dutch elm disease. See page 20.

PEONIES

Standard 3 to 5 eye divisions from young plants not over three years old. We do not cut any flowers from our fields, so you can depend upon receiving strong healthy plants. Numbers in parentheses (9.0) denote 1928 ratings of the American Peony Society on the basis of 10 as perfect.

Varieties marked with an asterisk (*) are recommended as good varieties for cut flowers.

MORE PROFITS FROM PEONIES

Although fall is the best time to plant peonies, good results can be had from spring planting. Peonies start to grow very early in the spring so the spring planting season is cut short. This disadvantage can be overcome by potting the roots in metal or composition containers in the fall. Then they can be planted in the customer's garden anytime, even after they start to grow. Oftentimes fall planted peonies will bloom the first spring and bring premium prices. Extend your peony selling season and increase your profits by potting in the fall.

LINING-OUT STOCK

Better stands. Pot plants have a better root system and stand the shock of transplanting better than bare root stock. You get better stands; it costs you less per plant care for them in the field; you have more finished stock to sell.

Better growth. Pot plants start off quicker and make a better first season growth; thus they are ready to market sooner.

You can plant later. Pot plants can safely be set out in the field much later than bare root stock. This gives you more planting time in your busy season. With irrigation you can plant nearly all summer.

Minimum Quantities. Please do not order less than 25 of any one plant. 300 of any one variety supplied at 1,000 rate.

CONTAINER-GROWN STOCK

We are producing a good assortment of nursery stock in Plantainers, including evergreens, vines, and shrubs. Write for special price list.

JUNIPER GRAFTS

For many years we have been grafting junipers with good success. Some of the largest nurseries in the country are among our customers for them. See the excellent assortment we are offering on page 48.

EVERGREEN GRAFTS

Our grafts are made by skilled workmen using our new up-to-the-minute propagation plant.

Minimum order: 25 of any one variety.
Ready for delivery, spring 1959.

Garee Blue Greenwood

JUNIPERUS SCOPULORUM

PLATINUM

(Plant Patent No. 1070)

New! Recently introduced by us. Brilliant silvery-blue color retained the year around. Dense foliage, requiring very little shearing to make compact and symmetrical. It has never blighted with us.

GRAFTS \$1.00 each

Other varieties can be grafted if scions are available

FRUIT TREES

The height given for fruit trees is approximate and represents the average height for most varieties. It is intended that the caliper shall govern.

Fruit trees are tied in bundles of 10 for 11-16 and 9-16; bundles of 20 for 7-16 and 5-16. Order in full bundles.

Plantainers

NO MORE SEASONAL LIMITATIONS TO SALES

PLANTAINER-grown nursery stock can be confidently sold and planted from early spring to late fall. Nurseries, garden shops and plant marts no longer class container-grown plants as perishable.

Flowering shrubs and trees can be sold at the height of their most attractive period. Uniform eye appeal—attractive **PLANTAINERS** improve the appearance of all evergreens, trees, shrubs and make possible a better product in a far better sales package. No messy burlap or tar paper—just tap your **PLANTAINER** and the plant is ready to grow with an undisturbed root system.

No setback—No losses!

CONTROL THE VARIABLES IN YOUR GROWING OPERATION

Every variety of tree or shrub can be grown in the soil mixture best suited to its requirements, and the nutrient level of this mixture readily maintained. No expensive plant food or water is wasted on weed crops, headlands, or between field rows. Drought periods do not exist with **PLANTAINER** culture.

LOWER PRODUCTION COSTS

No expensive digging or balling of plants . . . **PLANTAINER** stock is ready to deliver at all times.

More salable plants can be grown in less space. One acre will actually hold 184,240 **PLANTAINERS**. If one half of this theoretical acre were devoted to walks, service drives and display areas, there would still be space for 92,120 **PLANTAINER** items.

HERE IT IS IN A NUTSHELL

1. Healthier plants—stronger root system—attested to by satisfied users.
2. Tapered and crimped—permits nesting—space and time saving.
3. Have no rough edges—no serious hand and finger cuts.
4. Made of metal—durable—unbreakable.
5. Clean and sanitary—don't attract vermin and flies.
6. Painted green (baked enamel).
7. Enhance the beauty of plants and flowers.
8. Outlast other nursery cans—result—economy!—larger profits.

One Gallon Size

CONTAINER-GROWN NURSERY STOCK

In keeping with the trend of the times, we are now growing a large assortment of nursery stock in metal containers. Nurserymen all over the country are becoming interested in container-grown stock because they recognize its many advantages.

Our one gallon and two gallon cans are all PLANTAINERS. These cans are all tapered like a flower pot so it is not necessary to cut the can to remove the plant.

There are many reasons why you can make money with container-grown nursery stock. Here are some of them:

It is ready for the customer whenever he wants it. You lose fewer sales.

It is more convenient both for you and the customer because it is already "packaged."

It displays more attractively than bare root stock.

It extends your selling season by weeks and even months, thus increasing sales and profits.

It can be delivered to the customer in prime condition.

The customer gets better results and you get fewer complaints.

Your stock losses are less, because unsold stock can be carried over to the next season.

It appeals to a wider market, thus increasing volume of sales.

The customer can see exactly how plants look when in leaf and bloom.

Inventory control is simplified by the use of container stock. It is easier to maintain a balanced stock.

Write for special price-list of container-grown nursery stock.

Well-grown container stock in our nursery.

Are You Familiar With These?

They are described in this price list. Further information will gladly be supplied upon request. Why not offer your customers something new and different? They will appreciate it and you will make additional profits.

VISITORS WELCOME

WE INVITE YOU TO VISIT US!

We are always glad for the opportunity to show visitors over the nursery. Our locations is sixty miles southwest of Kansas City, on U.S. 50 and U.S. 59. Ottawa is also on the main lines of the Santa Fe and the Missouri Pacific railroads. There is a good municipal airport, two miles south of the city, and one mile east of U.S. 59, which parallels the north-and-south railroad. If you fly in, phone us from the airport and we will call for you.

"OPERATING A GARDEN CENTER"

by John J. Pinney

★ 25 Chapters

★ 125 Pages

★ 61 illustrations

This book covers all phases of garden center operation. It will help those who are planning to build a garden center to avoid many mistakes. Those who have established garden centers will find in it many ideas for the more profitable operations of their business.

Bound in a handsome, green plastic cover and printed on heavy white enameled stock.

\$3.00 per copy, postpaid**"BEGINNING IN THE NURSERY BUSINESS"**

Second Edition

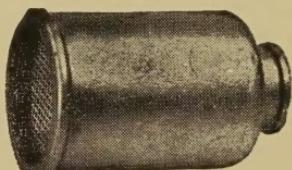

Revised and much enlarged

A 64-page book with chapters devoted to garden centers, landscape nurseries, mail-order nurseries, agency nurseries, container-grown stock, financing, and record-keeping.

\$1.00 per copy, postpaid**WILT-PRUF****WILT-PRUF**

Wilt-Pruf is a liquid plastic. When plant materials are sprayed or dipped in Wilt-Pruf, they are enclosed in a colorless protective plastic film which brings out the inherent beauty of the plant and then performs the important duty of protecting the plant against such menaces as drying out when indoors, or winter-burn and summer-scald when out-doors.
